# **Spring Plungers** • with moveable ball and slot 22051.0405

# **Product Description**

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. The running of the ball minimises wear on the counterpart, this also results in a positive locking behaviour depending on the counterpart.

Another advantage of the plastic ball is the electric insulation.

#### **Material**

### **Body**

• Stainless steel 1.4305

#### **Bearing**

plastic

#### Ball

· Stainless steel, hardened

#### Spring

· Stainless steel

#### Characteristic

Standard spring load: no marking

Standard spring load

Heavy spring load

#### More information

Customized design on request. Spring plungers are specially tested for spring range and forces.

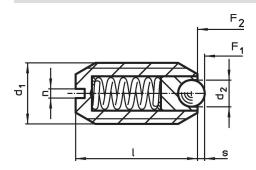

#### References

Thread lock on request, please refer to appendix - Technical Data -Calculation of indexing resistance, please refer to appendix - Technical Data -

### **Further products**

- · Locators, with bore hole, for spring plungers
- Locators, smooth, for spring plungers
- · Holders, for spring plungers
