

Spring Push Plungers · with mounting flange, horizontal

22170.1010

Product Description

The spring push plungers are used for simple and secure positioning of workpieces or components on stops and support points.

The spring push plunger is designed with a thrust pad that can be rotated 4 x 90° depending on the application.

Below h_2 , a pull-down effect is created when the thrust pad is installed in the appropriate position.

Material

Body

- Zinc die-cast, plastic coated, black, similar to RAL 9005, matt structure

Thrust Pad

- Stainless steel 1.4542

Screw

- Stainless steel A2

Spring

- Stainless steel 1.4310

Assembly

Assembly by means of washers ISO 7092.
