

Spring Plungers · with moveable ball and internal hexagon EH 22031.

Product Description

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. The running of the ball minimises wear on the counterpart, this also results in a positive locking behaviour depending on the counterpart. Another advantage of the plastic ball is the electric insulation.

Material

Body

- Free cutting steel, blackened
- Stainless steel 1.4305

Bearing

- plastic

Ball

- Ball-bearing steel, hardened
- Stainless steel, hardened

Spring

- Stainless steel

Characteristic

Standard spring load: no marking

Heavy spring load: marked with two lines

Standard spring load

Heavy spring load

More information

Notes

Special types on request.

Spring plungers are specially tested for spring range and forces.
