

High Knurled Thumb Screws • DIN 464

EH 24790.

Product Description

Knurled thumb screws are very versatile. Three material versions for the different requirements

- steel, blackened
- steel, zinc-plated by galvanization
- stainless steel

are available.

Knurled thumb screws can be easily tightened and released by hand. The ribbed outer surface of the nut prevents slipping when tightening / releasing with the fingers.

Knurled screws are one-piece manufactured. Contrary to the Standard Sheet, they are generally manufactured with a thread up to the head and with runout without undercut at the end of the thread. The screws can therefore not be screwed in up to the collar.

Material

- Steel, blackened, quality 5.8
- Steel, zinc-plated by galvanization, quality 5.8
- Stainless steel 1.4305, dull blasted

More information

Notes

Knurling pitch and knurling depth may differ from DIN.

Further products

- Flat Knurled Thumb Screws, DIN 653
